PROFESSIONAL SUMMARY

Results-driven Cybersecurity Professional and final-year MCA student at Manipal University Jaipur with expertise in vulnerability assessment, AI-driven threat intelligence, and cryptographic protocol design. Google Certified Cybersecurity Professional and developer of Deceptive-Net: a GAN-based Honey-Token Generative Framework engineered to detect and intercept financial credential theft on Dark Web portals by deploying deceptive token decoys that trace and neutralize unauthorized data exfiltration attempts. Proficient in network forensics, risk analysis, and translating complex security architectures into governance-ready documentation and executive reporting.

CORE COMPETENCIES

Penetration Testing & Vulnerability Assessment | Network Forensics (Nmap, Wireshark, Log Analysis) | AI-Security & Generative Adversarial Networks (GAN) | Cryptography (Symmetric/Asymmetric Encryption, KMAC DRBG) | Policy Drafting & Technical Documentation | DevSecOps (Secure SDLC: Python, Java, Kotlin, SQL) | Mobile Security (Android, Firmware Analysis) | Risk Analysis & Compliance Frameworks

PROFESSIONAL EXPERIENCE & INTERSHIPS

AI Fellow July 2026 – Present

Handshake AI – Fellowship Program

- Evaluated AI model outputs and prompts for domain-specific accuracy, security vulnerabilities, and safety compliance.
- Utilized Python and security analysis frameworks to evaluate model performance on complex edge cases; collaborated with domain experts to refine qualitative evaluation metrics.

Cyber Security Intern March 2025 – May 2025

Plasmid Innovation Pvt. Ltd. (In association with MSME DFO)

- Conducted structured vulnerability assessments and documented findings into formal risk registers aligned with digital resilience frameworks.
- Monitored active threat intelligence streams to identify indicators of compromise (IoCs) within defined SLAs; analyzed network traffic logs via Nmap and Wireshark to execute root-cause analysis.

Content Writing Intern January 2024 – March 2024

Earth5R Foundation (NGO)

- Formulated secondary research briefs, synthesizing sustainability datasets into executive-level policy documentation and stakeholder-ready reports.

Writing Intern January 2024 – February 2024

Marpu Foundation (NGO)

- Drafted public awareness documentation and structured institutional reports adhering to rigorous editorial standards.

TECHNICAL PROJECTS

Deceptive-Net | *Academic Capstone Project* January 2026 – June 2026

[GitHub: View Repository](#)

- Engineered an automated, AI-driven defensive security system utilizing Wasserstein GANs (WGAN-GP) to dynamically generate hyper-realistic honey-tokens and deceptive network artifacts during attacker reconnaissance.
- Architected the end-to-end data pipeline, GAN training methodology, and evaluation metrics aligned with NIST security frameworks.

Secure Password Generator | *Open-Source Developer* June 2025 – August 2025

[GitHub: View Repository](#)

- Engineered a cryptographic credential utility implementing custom entropy-maximizing algorithms to minimize predictable pattern vulnerabilities.
- Designed for secure SDLC integration, complete with comprehensive technical documentation and algorithmic complexity analysis.

EDUCATION

Master of Computer Applications (MCA) September 2024 – June 2026

Manipal University Jaipur, Rajasthan, India

- Aggregate:** 76% | **Core Focus:** Advanced Network Security, Cloud Architecture, AI, Cryptography

Bachelor of Computer Applications (BCA) September 2021 – May 2024

Vivekananda Global University, Jaipur, Rajasthan, India

- Aggregate:** 75.40% | **Specialization:** Cloud Technology & Information Security (CT&IS)

CONFERENCES & PUBLICATIONS

7th ICDSA Conference, 2026 July 2026

Paper Presentation before Session Chairs – *"Robust Password Generation Through KMAC DRBG: A Post SHA-2 Performance and Entropy Analysis"* – Status: Under Review by Session Chair Members

CERTIFICATIONS

Ethical Hacking Essentials (EHE) – **EC-Council** | Google Cybersecurity Professional Certification – **Coursera** | The Joy of Computing using Python – **NPTEL** | Code Red Hackathon – **ACIC - VGU & AIM**
